Lac La Biche Rink To Be Expanded

Fire Fighters Receive Praise

LAC LA BICHE — In the article in praise of police and fire fighters, by Henry Thompson, which appeared in last weeks edition of Lac la Biche Herald, the third paragraph should have read:

"The two main arms of civic administration for the protection of property and persons, in my opinion, do not get sufficient appreciation from those of us whose business and person it is their job to protect."

Pastor Honored At Farewell Party

LAC LA BICHE — A large gathering from the congregations of the Evangelical Free Churches of Lac la Biche and Hylo met at the home of Mr. and Mrs. Andy Guinand at Hylo, on Thursday evening of last week to bid farewell to Gilman Moe, pastor of the churches since September.

Games were played and a number of vocal selections from a group of young people from the Hylo district were enjoyed. Lunch was served by the ladies. As a parting gift, Mr. Moe was presented with a wrist watch.

Regional Welfare Officials Changed

LAC LA BICHE — It has been learned that Frank Lockwood, who has been serving as supervisor at the Metis Colony at Kikino, will be joining the staff of the department of welfare regional office here.

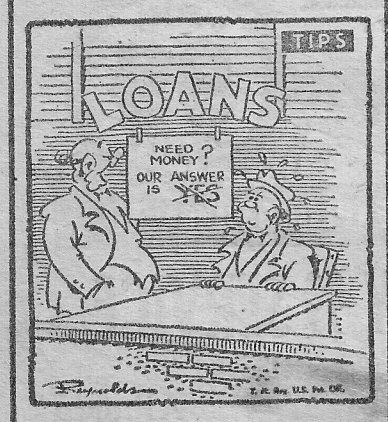
Cameron Bracken, who has served as assistant's position, ater spending a few weeks at headquarters in Edmonton. Mr. Comley goes to the Edmonton offices May 1.

Career Day Held At Lac La Biche

HYLO — The Hylo Grade 9 class attended the Career Day which was held in the Lac la Biche High School on April 24. The topics spoken on were University Training, Teacher Training, Business Education, Trade Training, Technological Training, Occupations In General, Armed Services, Nursing, Forestry and Agriculture.

Margie

Mr. and Mrs. Joe Tremblay of Margie, Mile 174, have returned home after visiting their daughter, Mrs. Lily Thomas and family of Edmonton.



"My ad in ALBERTA COUNTRY LIFE classifieds gets me so much business — I can afford to say 'No' occasionally."

Oolichans, Ooligans, Oulachans. There's confusion about the spelling on the West Coast, but in the east they call them smelt. No matter what they're called, they're running up rivers and streams from the east coast to the Great Lakes to the west. Fisherman Denny Dieterle landed a catch in British Columbia that would make any fish-fry addict's mouth water.

Present Highway 46, Abee South, Approved By Location Engineers

Gordon E. Taylor, minister of highways, announced recently that the present location of Highway 46 south of Abee had been approved.

The location engineers of the department have been checking other possible routes before any improvement was carried out on Highway 46, including the route west of Thorhild. Any change in the route from the present one would results in increased curvature; it would also mean purchasing entirely new right-of-way which would sever considerable land. An additional 2½ miles of highway would also have to be constructed, as Highway 28 now serves this purpose.

It is the intention of the department of highways to commence the improvement of Highway 46 from Highway 28 later this season.

The location engineers are continuing to check lines from south of Abee north, and a decision will be made on this when all the field information has been gathered.

Applications Under Winter Works Program Approved By Town Council

LAC LA BICHE — All councillors and the mayor and secretary-treasurer were present at the April 25 meeting of town council. Building permits for two dwellings to cost $2000 and $2,500 each were approved.

Winter works projects were again discussed and the secretary informed the council approval had been granted to the two applications recently made for jobs under the plan. Wages for workmen on the winter works projects were set at $1 per hour for laborers, and $1.75 for qualified carpenters.

Work on enlarging the curling rink is expected to get under way very soon. Present plans call for widening the building by adding the width of another sheet of ice on the south side of the present building. This will still leave plenty of room for parking on the south side. The plans call for an addition on the front of the building to allow for rest rooms which will be accessible from the sports grounds. The area will be a busy spot during the next few weks, as all winter works projects must be completed by the end of May.

Mayor Maccagno informed council that Mr. Noel Dant, of the town and rural planning branch of the department of municipal affairs, had offered to attend a meeting of council to discuss the proposed replotting scheme the town has under consideration. Mr. Dant is expected to be present at the next regular meeting.

A tender for installing hot water in the town offices was let to Andy Hamilton Plumbing and Gasfitting Ltd.

Business tax by-law No. 337 was given second and third readings and passed unanimously. The by-law does not introduce any important changes over the previous one in force, but was required in order that certain classes of businesses, not specifically named in the original by-law, might be properly listed.

Correspondence was read in connection with efforts on the part of the town to interest a dentist in settling here. The council has hopes that these efforts will bear fruit before too long.

One ratepayer from the south side was present to ask what the possibilities are of that area getting gas this year. The mayor said a plan has been prepared whereby that area would be served with gas this year, and it is expected that the plan will be carried out.

The secretary was asked to have a notice published in the local paper warning parents of the danger in allowing children to play near the banks of the lake because of the possibility of earth slides. The exceptionally high water of last year caused undermining along a large part of the lake banks next to town, and with frost going out, the danger is serious.

Dawson Creek Child Dies Of Pneumonia

Fire Brigade Quells Blaze

LAC LA BICHE — The fire brigade was called out Thursday last week to quell a grass fire which had got ten out of control at the property of Mrs. G. Cadieux on the south side of town. The fire alarm sounded at 11:05 a.m. and within one and a half minutes the fire engine was fully manned and on its way to the trouble spot.

Some damage was done to a chicken coup, but none of a serious nature. Since Thursday is the day when business places are closed, the record of the brigade in responding to the alarm is considered all the more worthy of mention.

It might be a good idea to remind you, before you take that automobile trip, to drive carefully all the time.

Cooking School Proves Success

PLAMONDON — About 40 ladies and a few men attended the Co-op cooking school and cooking demonstration held in the Community Hall on Saturday afternoon of last week.

Mrs. Mary Costigan, graduate home ecconomist, gave an interesting display of baking, bread of many Lands. Her display of buns, breads, casserole dishes and foods was something new and was attractively displayed.

The display of Co-op products was also worth seeing. After the demonstration, coffee and buns and breads were served.

Albert Plamondon spoke on behalf of the Maple Leaf Co-op, thanking the demonstrator and the ladies who had helped, also Mr. and Mrs. Claude Gauthier for arranging the event.

The door prizes were won by: Mrs. Harry Dixon, 50 pound bag of flour; Mrs. Eugene Plamondon, 25 pound bag flour; Mrs. Jeanne (Alcide) Plamondon, 10 pound bag.

THE Homemaker

By BERTHA M. McCUTCHEON

Not since "Love is a many Splendored Thing" hit the movie screens has there been such a strong Chinese influence in fashion. Now, another movie, "The World of Susie Wong" has been released and Canadian Manufacturers are ready. They are showing everything from sleepwear to dresses with oriental patterns, mandarin collars, side slits and frogs.

HAWAIIAN INFLUENCE

Also watch for the bold, big patterned prints typical of Hawaiian dress. One of the prominent Hawaiian manufactureres, "Alfred Shaheen Hawaii" is having his garments sent to Toronto where they are being distributed throughout Canada.

JACKIE KENNEDY INFLUENCE:

Dress manufacturers are all ready with a line of garment copied from the clothing worn by Mrs. Kennedy, wife of the newly-elected President of the United States. It emphasises a very casual trend-simple lines, and a semi-fitted and eased appearance. The Jackie Kennedy rough textured straw pillbox is worn on the back of the head, and features a bit of veiling and a silk organza rose or two for spring and summer wear.

B. McCutcheon

KNIT WEAR:

Knit wear will reach a peak this spring unprecedented in its previous history. Look for suits and dresses in wool, orlon, cotton and blended knits. Most of them are hand washable and are a boon for the traveller. Many styles are available in knits; the eased look, the cardigan coat, the sleeveless dress, the pleated skirt, two or three piece suit, etc. All of the current colors are now available in the knits.

COLOR IS THE BIG NEWS:

Shocking pink is the color for Spring this year. You'll see it everywhere you look including accessories as well. Mauve is still strong in the lilac shade-more greyed than last fall. Favorites for coats and suits are off-white called Birch, banana yellow, and pale watery spindrift green. All colors this spring are vibrant and gay-especially in the stripes.

FASHION HIGHLIGHTS:

Deep armholes or drop shoulder line and wide backs in coats.

Sleeveless overblouse a must with a suit.

No collars on coats or suits; might have a stand-up band.

2 or more colors combined in coats, suits and dresses.

Sleeve-less dresses and blouses.

Contrasting panels on dresses or inside box pleats.

Skirts with ease—bias cut gored, flared, box-pleated.

Swimsuits—extremely low backs—mostly knits.

Culottes (divided skirt) in lounging, sportswear, dresses and now in suits.

NOTICE

The Council of the Town of Lac la Biche takes this opportunity to warn all residents that the banks of the Lake are a danger zone. Because of the exceptionally high level of the lake during the past year, slides and cave ins are apt to occur without warning. Parents in particular are warned to keep children away from the danger areas.

Travelling Reporter

By Martha Fraser

With the passing of winter and coming of spring I find myself mulling over the vicissitudes of life and my rambling around the country. Travelling in the winter time is not as cold and hazardous as some readers may think.

People are just as cheerful (or grouchy) just as humorous, and just as friendly as they are in the warm weather months. I've enjoyed roving all over. I think I am the luckiest person for I always run into the most pleasant of folks no matter where I go.

Take Elk Point, for instance. That's where our newest paper is. The Elk Point Hunter. Never could more friendly people be found than those who reside in Elk Point. I've been there twice and each time have I run into blizzards, wind and mud, but let me say this, that the coffee those folks brew is of the very tastiest, and that made it that much easier to cope with the weather conditions.

MORINVILLE

Morinville, of course being mostly French is very friendly too. What I found most delightful about this town was that I got to know some of the young folks there. One little chap entertained me by singing in French and I was more than ever sorry that I do not speak that language. These people that are bilingual are very fortunate for they have something very precious over us who are one-language types. Morinville, too, is the centre of one of the oldest settled communities in Alberta.

ONOWAY

Onoway, also is an old settlement, rich in historic lore, with a fertile farming community surrounding. I heard some stories of the early days in the settlement and again the stamina and courage of those who first broke the sod and built homes brings out the vast differences of life today.

BON ACCORD

Bon Accord, also is right in that catagory. Good farming and good cattle. These villages have produced many good business and top notch men in other fields as well.

WHITECOURT

Whitecourt situated amid forests, rushing rivers, and hills. One happy instance about this place is the excellent highway which connects Whitecourt to Edmonton and on the other side to the far north. Just now there is in some excitement over the proposed pulp mill and over the sulpha plant which is being built some 30 miles away. A new Forestry Station has recently been built and if you haven't already seen this site —well you've missed something. The setting is just wonderful—up the hill from the village—right in the forest of tall and stately trees.

Several new business have applied admittance to the business section. Whitecourt is at the present time "dug up" but will enjoy the benefits of a water system this summer. It is hoped that natural gas will arrive this year as well. Here we see a decided influx of people.

LA LA BICHE

Lac la Biche has resort advantages, good fishing too. This is always a lively town. The Department of Public Works has built garages and store rooms for the use of the Forestry Branch here. Lac la Biche is a steadily growing center.

INNISFREE

During all my winter's travel I have seen but one coyote—and that was west of Innisfree. Jack rabbits, yes, of course. I am hoping to get a few good looks at the buffalo when passing through Elk Island park now that warmer weather is ahead of us. Incidentially I believe I have one of the finest, if not the finest, movie films of buffalo that has ever been taken in this park. I only wish I could find the time to do some takes around the country I travel around.

I always find it most interesting to meet and talk with our local editors and reporters. They are a dedicated lot and decided asset to each community. Without their co-operation we would have no local papers worth while. I hope each reader will remember to contact the editors or reporters very often for only through full co-operation can we have full coverage.

Until next time good luck to you all.

Myrnam Girl Wins ACT Talent Search

Patricia Lynkosky Awarded Sunwapta Scholarship In Finals Held At Leduc

Patricia Lynkowsky, 17-year-old concert pianist from Myrnam, won the Sunwapta scholarship and first place at the ACT-CFRN Search for Talent finals held at Leduc Saturday. Miss Lynkowsky was declared winner over six other contestants before a capacity audience at the east elementary school.

The Saturday show marked the conclusion of the 1960-61 search for talent shows held weekly since last October in support of the ACT Northern Alberta Crippled Children's Fund. Twenty-six shows were held and approximately $12,000 was realized for the fund. More than 450 contestants took part during the season.

Second place went to the Alliance Minstrels, a group of five housewives who originally won first place at the Killam show and one week ago were placed first at the western regional semi-finals at Wetaskiwin. Miss Lynkowsky won first place at the Mannville show in February and was placed first at the eastern regional semi-finals at Vegreville April 15.

Claire Doucet, a vocalist from St. Paul, was judged third best at the finals and fourth place went to Dianne Williams, a tap dancer from Pibroch. Miss Doucet won the St. Paul show in January and Miss Williams was winner of the Westlock show.

Judges were Mrs. Olive Emond of Leduc, Miss Edith Heavener and Allan Rumblelow, both of Edmonton.

Also competing were Bob Adamson of R.R. 5, South Edmonton; Judy Stoski of Two Hills and Louise Blake of Devon. Mr. Adamson was original winner of the New Sarepta show and the other two finalists won their shows in their respective towns.

Besides the seven finalists several other special attractions were presented. Spotlight Parade Variety show featuring several Edmonton radio and television personalities followed the contestants.

Two features from Thorsby and the Leduc Community Band rounded out the evening's performance. A group of Ukrainian folk dancers under the direction of Mrs. Olive Chranowski presented two number.s Walter Melnyk, a former winner of Search for Talent and presently a hotel manager at Thorsby, brought back memories of the early fifties with two comedy numbers. The Leduc Community Band opened the evening's show with several selections under the direction of Bruce Marsh.

Representatives of several business firms which have participated in various ways in support of the shows during the season, took part in the presentation of awards.

George Duffield, production manager of Radio Station CFRN, presented the Sunwapta Scholarship to Miss Lynkowsky. J. J. Jefferson of Northwestern Utilities Ltd., Don Chernochan of Molson's Edmonton Brewery and Al Scott of Weber Bros. made the presentations to the other winners.

Earl Warren was master of ceremonies and Al Creighton was the ACT team captain. Rollie Balcer of Leduc was the winner of the program prize and J. Thompson, 9010-106 Avenue, Edmonton, won the watch.

The final show will be seen on CFRN-TV at 1:30 p.m. Saturday in a delayed broadcast.

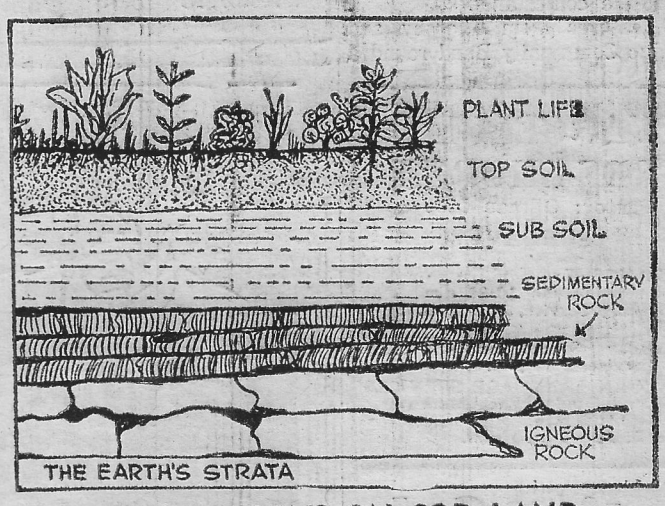
Garden Graph

By DEAN HALLIDAY



NEW GARDENS ON SOD LAND

MANY NEW gardens will be developed this year, many on new land, meaning soil which has not recently been cultivated and has reverted to heavy sod cover or a growth of weeds or brush. Where a heavy vegetation exists, the soil will be found fertile and can be adapted to vegetable gardening.

The accompanying Garden-Graph shows in a general way the earth's strata. Soil is the surface layer of the earth which supports all plant life. The composition, character, color and the depth of the soil depend on the weathering of the underlying rocks by wind and rain and by expansion and contraction, the decay of vegetable matter and the action of earthworms over long periods of years.

Whether the soil in your garden is a sweet or sour type can usually be determined by the type of weeds which grow upon it. Soil which grows a luxuriant crop of weeds is definitely fertile. Sheep sorrel, moss, bracken ferns or other acid-loving plants indicate a soil on the acid side. Alfalfa, clover and other members of the pea family are found growing on a more alkaline soil. Fortunately for gardeners, soils can be changed in character. Lime, for example, is used to correct acidity, while aluminum sulphate or tannic acid is used to make soil more acid.

Crop Change Prospects Look Good, Rapeseed Export Market Expands

There has been a substantial interest in the farmers of western provinces in diversifying their grain crops, particularly a change to other types of cash crops, such as rapeseed. The export market for rapeseed is expanding and Canada has been able to secure a share of this.

Canada also imports many million dollars worth of oil seeds, and rapeseed could replace a substantial quantity of this.

H. M. Horner, MD, MP for Jasper-Edson, made the following information regarding the grading and cultivation of rapeseed, available to farmers in his area who may be going to grow it for the first time.

Instructions for planting and harvesting Polish rapeseed, according to experience with it in western Canada, are as follows.

Polish rapeseed grows best on black loam soil and should be planted on good summerfallow. It will grow on sandy soil, but yields less there. It will grow and mature very well in sloughs or low land. It will grow better on alkali soils than cereals. Rapeseed grows best in a cool, moist climate.

If possible harrow summerfallow as early as possible to start weed growth.

Wait until weeds are two to three inches high or until May 20 and cultivate three to four inches deep harrow, pack with surface packer, doing all the operations as soon as possible to conserve moisture.

Any double disc drill will seed rapeseed. Mixing with fertilizer works well, but it wears out the drill. If you leave the fertilizer mixed with the rapeseed overnight, the germination of the rapeseed will be killed. Rapeseed can be seeded very well through a fertilizer attachment, or grass seed attachment.

A press drill makes a very nice job of seeding rapeseed. If an ordinary drill is used, packing should be done after seeding also.

It is important to seed down to moisture so good germination is obtained at once. If the top of the ground is dry, do not be afraid to seed the rapeseed down to moisture. It will come up even if planted two inches deep. If it lies in the dry ground, it will not germinate until it rains, and by then it may be too late for it to mature in the fall.

About seven pounds of Polish rapeseed per acre is plenty. If broadcasting eight pounds per acre is plenty. Seed about one inch deep.

Ferilizing with 25 pounds or more of 11/48 amonium phosphate fertilizer will definitely increase yields and hasten maturity.

Polish rapeseed matures in about 70 days and can be seeded up until June 15, although May 20-25 is advisable. With late seeding one has to be careful of poor germination due to hot weather drying out the ground surface. It is about a month earlier than Thatcher wheat.

Rapeseed cannot be sprayed, as 2,4-D will kill it very easily.

A good average crop of Polish rape on summerfallow will yield 1,000 pounds per acre, although one can get higher yields under exceptional conditions.

Rapeseed on stubble will never yield as well as on summerfallow. It should definitely not be seeded on stubble land which contains a lot of weed harvest as soon as seed is matured, having moisture of 10.5% or less.

Polish rapeseed can be straight combined as it does not shatter easily, and it matures early. However, if the crop is very uneven, or if there is a lot of green weeds in it, especially pigweed, it may be advisable to swath it. If the crop is light, the swaths will roll over the fields in a high wind. If you swath, you will probably combine a week to 10 days earlier.

Use combine with rub bar cylinder.

Have the cylinder about one-half open, just enough to thresh the rapeseed, which threshes very easily.

Use small amount of wind on the sieves. Special blinds may have to be made for the fan.

Speed of cylinder should be 700-750 rmp, any speed over 800 rpm will crack rapeseed which cracks will be dockage. It should not be combined at same cylinder speed as wheat. A special cylinder sprocket 700-750 rpm should be obtained.

Rain will not make the seed tough as easily as it will with wheat, and you can combine rapeseed earlier in the morning and later at night than you can wheat, as the straw does not get tough so easily either.

In case of combining early in the fall, a lot of green pigweed in rapeseed will make it heat very quickly unless it can be cleaned out at once.

Golden rapeseed matures about one month later than Polish. Golden rapeseed matures in about the same time as Thatcher wheat. Seed 10 pounds per acre.

Golden was selected out of Argentine by Dr. W. J. White of the University of Saskatchewan.

Golden will yield better than Polish on fairly level land, but it must be planted about May 15-20, or it will surely freeze in the fall. It shatters when ripe and should be swathed if possible. Golden seems to yield well on the Prairies. The relative yields of Polish and Golden will depend on when the rains come. Golden is not as safe to grow as Polish. A frozen crop of rapeseed does not pay.

In general, we recomend Polish rapeseed for the northern parts of the Prairie provinces, and Golden for the south. Polish is about a month earlier than Thatcher wheat and can be straight combined.

Arlo rapeseed is practically the same as Polish. Arlo yeilds the same as Polish.

People who do a lot of talking about religion rarely do more than talk.

County of Athabasca No. 12

NOTICE TO PARENTS OF SCHOOL BEGINNERS

Under Section 177 of The School Act the County Committee requires that entry to Grade 1 shall be confined to the commencement of the school year and limited to pupils who will have attained the full age of six (6) years on or before October 31st.

Our schools can offer only regular first grade work for beginners and only the adequately mature children should be enrolled. An advantage is gained in the long run by a child being over age rather than under age on entering school.

In order to facilitate organizational planning for the 1961-62 school term, parents are asked to register with the Principal of the school concerned. Failure to do so before May 31st, 1961, may deprive your child of admittance to school in September, 1961.

ATHABASCA HEALTH UNIT

PUBLIC HEALTH NOTICE

PREVENTIVE DENTAL PROGRAMME

The Athabasca Health Unit is planning a preventive dental programme for 1961, similar to that introduced last year. The programme will start about the second week in June and will continue for approximately twelve weeks. The dental unit and staff will be located in chosen locations within the Health Unit area so that as many children as possible can obtain benefit.

Due to the fact that the programme will only be in being for a limited period, parents must realize that it will not be possible for all children to receive treatment. Those children in Grades I and II who received topical fluoride application to their teeth during last years programme, will be seen again to have the fluoride reapplied and their teeth checked by the dentist. Parents of the above-mentioned children will receive a letter stating the time and place of their child's appointment.

It is also planned to have the dental programme cover the most urgent cases for dental treatment in the group of pre-school children who will be entering school this fall. All parents having children entering school this year for the first time are requested to take them to the nearest Health Clinic or Municipal Nurses office during regular or advertised clinic times. Parents are requested to do this without delay so that a survey can be completed as early as possible.

All treatments carried out at these dental clinics will be FREE.

It is regretted that it will be impossible to have all children requiring dental care treated during the course of this year, but as many as possible of the urgent cases will certainly receive the benefit of the service. All parents are requested to realize this fact and adopt an understanding attitude.

Dr. and Mrs. W. C. Smalley

Outstanding Baptist Leader In Wide Demand As Guest Speaker

An outstanding leader in Christian work is Dr. W. C. Smalley of Edmonton, a Baptist minister recently retired from the post of General Secretary of the Baptist Union of Western Canada.

Dr. Smalley is one of Canada's outstanding preachers and since his retirement has been in demand as pulpit supply and guest speaker on the North American continent.

Mrs. Smalley also has been an outstanding leader in Baptist work. She accompanied her distinguished husband to Rio de Janeiro, Brazil, last June to attend the meetings of the Baptist World Alliance.

It was at such a meeting in 1950, held in Cleveland, Ohio, when Dr. Smalley made the motion to accept the Baptist Union of Hawaii into the Baptist World Alliance.

Other Baptist World Alliance meetings attended by Dr. Smalley include Toronto, 1928; Berlin, 1934; Atlanta, 1939; Copenhagen, 1947; London, 1955. Dr. Smalley has been for 21 years a member of the executive of the Baptist World Alliance and has held the post of vice-president.

Project Of Curling Club Receives Final Approval

LAC LA BICHE — S. Odynak, president of the Lac la Biche Curling Club called a meeting of the executive and loan backers, Monday, April 24 at 8:30 p.m. There were 18 present at the meeting. After some discussion, final approval to the enlarging of the Lac la Biche Curling Rink from two to three sheets of ice along with extensive plumbing and waiting room facilities was given. It was discussed that Mr. Hillman, an able foreman, may supervise the project.

Dr. D. D. Bouvier and William Tarrabain, of the building committee, prepared plans for the enlargement. This was presented as a proposal to the annual meeting and same was approved. The project was made possible as a result of the following circumstances. Up to May 31 all labour costs involved will be shared partly by the Federal and Provincial Governments, under the Winter Works program. The curling club is situated within the Lac la Biche recreational centre. This will enable it to benefit from the Provincial Recreational grant to the extent of plumbing facilities which would also provide adequate facilities and headquarters for many occasions through the summer as well as the winter months. In order to further establish the financial completion of such a project, the building committee, in addition to a sum of $1500.00 on hand in the curling club building fund, procured a loan through the backing of 13 local men of the town. Commencement of the project is expected within the next week or two.
